The Future of Education

An EPA Trust Thought Leadership Seminar

BOOK NOW

Leaders have always prepared their organisations for the challenges, and even greater opportunities, of an uncertain future. Educators will need to innovate and be bold in bringing artificial intelligence into our schools - on our terms. It will be fascinating to see how the best leaders globally develop AI alongside the challenges of teacher recruitment and development.

EPA came out of COVID stronger, more successful, intellectually curious and with a strong collaborative leadership team and development programme. This puts us on the front foot, for a new frontier...

David Brown
Chief Executive, EPA

EPA is a multi-academy trust of primary, secondary, and all-through schools in Oxfordshire, with 3,500 students and 500 staff. With a vision of 'Aspiration, Collaboration and Excellence', we are one of the top trusts in the region for Key Stage 2 and A Level outcomes and have a considerable reputation for school improvement.

High expectations are key to our success and central to this is the collaboration across all age phases and schools. Our partnerships, both local and national, along with high levels of staff retention and leadership development, provide a rich foundation of practitioner experience and expertise.

Join us for the 'Future of Education' seminar on Thursday 21st March at Trinity College.

Esteemed speakers Alma Harris, John Howson, and Lindsay Nadin will delve into leadership, the educational and recruitment landscape in Oxfordshire, along with the role of digital learning and AI in education.

Aimed at an audience of Trust colleagues, directors, governors, and invited guests, as a part of the Trust's wider strategic conversation. Ensuring that our strategy and leadership for change can achieve the best possible futures for the families and community we serve.
